

Webinar Series

Please join **TippingPoint** and **SolutionPros** every **Thursday** at **2:00pm, 3:00pm, or 4:00pm** for an on-line demonstration of the leading IPS (Intrusion Prevention System). **Robb Emerson**, with Tipping Point, will share how the TippingPoint IPS is the best solution to protect and manage your network. This presentation will be an interactive live demonstration of a TippingPoint® IPS appliance and the management console via a Web based portal.

A brief summary of what you will see and hear:

- TippingPoint's Intrusion Prevention Systems provide Application Protection, Performance Protection, and Infrastructure Protection at gigabit speeds through total packet inspection.
- Application Protection capabilities provide fast, accurate, reliable protection from internal and external cyber attacks.
- Through its Infrastructure Protection capabilities, the TippingPoint IPS protects VoIP infrastructure, routers, switches, DNS and other critical infrastructure from targeted attacks and traffic anomalies.
- TippingPoint's Performance Protection capabilities enable customers to throttle non-mission critical applications that hijack valuable bandwidth and IT resources, thereby aligning network resources and business-critical application performance.
- The system is built upon TippingPoint's [Threat Suppression Engine \(TSE\)](#) - a highly specialized hardware-based intrusion prevention platform consisting of state-of-the-art network processor technology and TippingPoint's own set of custom ASICs
- The integral part of the TippingPoint solution is the [Digital Vaccine®](#) Service. Developed by TippingPoint's world-renowned security researchers (DVLabs), the Digital Vaccine service delivers comprehensive security filters to TippingPoint Intrusion Prevention Systems to pre-emptively protect against the exploit of new and zero-day vulnerabilities.
- The ease of managing the IPS and obtaining reports.

Date: Every Thursday

Time Slots:

2:00pm

3:00pm

4:00pm

Location: The comfort of your office, your computer and the Web
